

WHY DOCTOR'S BIOME?

15 Strains of Extensively Researched Scientifically-Backed, Probiotics

Doctor's Biome only uses strains that have been extensively researched and scientifically tested for promoting healthy digestion.

Active, Living Cultures

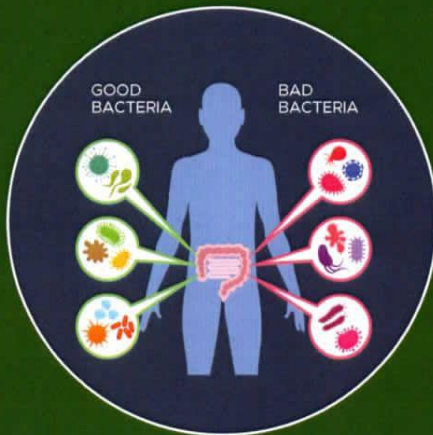

All bacteria are living (not just alive) at time of manufacture. What this means is that the healthy gut bacteria are strong and growing and reproducing in number virtually every day. Unlike, freeze-dried probiotics sold in capsules or powders, the probiotics in Doctor's Biome are delivered in a concentrated liquid form, which allows for faster absorption and maximum benefit.

Smart Bacteria

The 15 strains of probiotics or "healthy bacteria" compete against a spectrum of harmful bacteria and yeasts for space and nutrients, which helps to rebalance the gut and support healthy digestion.

27 Billion CFUs

Our 2 ounce single serving provides an easy daily dose of 27 billion CFUs.

CUSTOMER TESTIMONIALS

“ ————— ★★★★★

Best product in this world!

I take this every day and it is unbelievable. Tastes excellent, no more bloating, and skin looks amazing too. Also, helps you control your weight. I give it to my parents patients. I am dentist in NY.

• Alina D.

“ ————— ★★★★★

Excellent for leaky gut.

I have suffered with a severe gluten intolerance and leaky gut for 9 years, and have tried too many supplements to count, but after a bout with diverticulitis, my physician recommended Doctor's Biome, and almost immediately I noticed a difference in my gut! I do not experience the burning discomfort in my right side anymore, nor do I have to take as many digestive enzymes after my meals as I've been accustomed to taking. It truly is a blessing!

• Karen E.

“ ————— ★★★★★

Feeling better.

Better low end intestinal function. Constipation as a side effect of medications has been mitigated. It seems that as my "Gut" works more efficiently, my energy levels are increased, my appetite is more consistent and I am more "regular". Thank you Doctor's Biome for the Life changing therapy.

WHAT MAKES DOCTOR'S BIOME DIFFERENT FROM OTHER PROBIOTICS?

DOCTOR FORMULATED

Our team of doctors has created a proprietary blend, which contains 15 strains of probiotics chosen from clinical studies, especially those beneficial to compete against harmful pathogens (e.g., Clostridium difficile and Candida albican). Our probiotics are sourced from the world's leading supplier of probiotics (DuPont).

27 Billion CFUs (Colony Forming Unit) of prehydrated, actively living probiotics in each 2-ounce bottle.

As the product ages, it becomes even more potent providing you don't exceed the ambient storage temperature or shelf-life.

Our probiotics are delivered in a natural blend of organic vegetable & fruit juices (mint juice, cucumber juice, apple juice, lettuce juice, kale juice, celery juice and lemon juice) with a delicious fruity sweet/tart taste.

Shelf stable for two months stored at room temperature (70F) and four months refrigerated. **Do not allow to freeze or be heated.**

Doctor's Biome is living and growing and thriving from day one - ready to function!

To be taken on an empty stomach, 30 minutes before eating to ensure maximum absorption.

Our probiotics, "the good guys" thrive and populate in the bottle, and then continue to when entering your digestive system. As the "good guys" outnumber the harmful bacteria in your microbiome, this is when your gut starts to rebalance and feel better.
